In the Press

Tiny Miracles is an Amsterdam and Mumbai-based foundation and award-winning social empowerment enterprise.

We believe our generation has the power to end unnecessary poverty. We create quality design and lifestyle products that are crafted by poor communities who, by doing so, break their cycles of poverty and empower themselves.

After 10 years of trial and error, we've found a scalable way to create a more equal world. We call it the Get Out - Stay Out approach. Here we first enable poor communities to Get Out of poverty with a focus on healthcare, education, awareness, and job creation. We then enable them to independently Stay Out of poverty.

**TINY
BUT
MIGHTY.**

**IT'S
SIMPLE,
REALLY.**

We design beautiful products.

We get beautiful people to make these products.

People who, through no fault of their own, happen to be stuck in never-ending cycles of poverty.

Together with our partners from across the globe, we sell these products to other beautiful people who understand that their lives are infinitely richer if fewer people are infinitely poorer.

**It's quite simple. And beautiful .
It's the most human thing ever.**

PRODUCTS ROOTED IN DESIGN

Created in collaboration with award winning Dutch designer Pepe Heykoop, our products are simple but striking.

After 3 years of dedicated testing, we've thoughtfully designed a selection of contemporary products that combine the use of simple easy-to-train techniques (such as hand-folding & stitching), and sustainable resources (such as bamboo & paper).

Handcrafted by unskilled people who've been left behind by society, our products are a means to a larger ambition: to create life-changing opportunities for people.

Simplicity meets sophistication in this folded lampshade. Its innovative design allows a flat folded paper construction to unfold like a flower into a beautiful lampshade, which can be used with any existing hanging fixture.
